OBJECTIVE

To secure a Backend / Full-Stack Developer role at a growth-oriented company where I can apply my Node.js, MERN stack, and REST API expertise to build scalable products and contribute meaningfully to a collaborative engineering team

PROFESSIONAL SUMMARY

Final-year CS Engineering student (CGPA 9.43, graduating Jun 2026) and GTU Semester 1 University Topper (10 SPI). 6 months of professional internship experience (Jan 2025 – Jun 2025) at Hummingbyte Technologies, delivering production APIs and full-stack applications in agile teams. Active GSSoC 2026 open-source contributor (9,000+ points) · Built AI-powered tools using Gemini API · Exploring RAG, Vector Databases & GenAI architecture · 180+ LeetCode problems solved

KEY COMPETENCIES

REST API Design · System Architecture · JWT Auth · WebSocket's · LLM Integration · Prompt Engineering · Gemini API · Vector DB (Learning) · DB Optimization · Async Programming · Open-Source Development · Agile Collaboration

PROJECTS

Airline Booking System (Node.js, Express.js, MySQL)

- Built 10+ booking, cancellation & flight-search APIs with modular architecture for concurrent users.
- Optimised MySQL indexing strategy, cutting query latency by ~25% on high-traffic booking endpoints.

Real-Time Chat App (MERN Stack, Socket.IO)

- Engineered bidirectional messaging with Socket.IO handling 50+ concurrent connections across rooms.
- Solved session persistence challenge with JWT authentication and a responsive React UI for seamless user experience.

AI Code Reviewer (Node.js, OpenAI API, Vector DB, RAG)

- Built an AI-powered code review tool using a RAG pipeline to index codebases into a vector database for context-aware feedback.
- Implemented Graph RAG for dependency-aware code reviews and integrated the Gemini API to generate actionable suggestions for each function.

Twitter Backend Clone (Node.js, Express.js, MongoDB)

- Developed 20+ social APIs (tweets, likes, comments, hashtags) with role-based access middleware.
- Designed MongoDB schemas with strategic indexing to improve read performance on high-volume queries.

INTERNSHIP EXPERIENCE

Software Developer Intern (6 months · Full-time)

Jan 2025 – Jun 2025

Hummingbyte Technologies Pvt Ltd | Vapi, India

Designed and delivered 15+ production REST APIs using Node.js/Express.js, improving reliability across 3 core product modules. • Optimised MongoDB & MySQL queries reducing average data retrieval time by ~30%, significantly improving app responsiveness. • Built JWT-based authentication & role-based authorisation system securing data access for 500+ user accounts. • Collaborated with a cross-functional team of 4 developers in Agile sprints; conducted peer code reviews ensuring code quality standards.

SKILLS

- Languages: Java, JavaScript, SQL, C
- Frontend: React.js, HTML/CSS
- Backend: Node.js, Express.js, REST APIs, JWT Auth, WebSockets (Socket.IO)
- Databases: MongoDB, MySQL
- Tools: Git, GitHub, Postman, Maven, Gradle
- Soft Skills: Team Collaboration, Agile/Scrum, Code Review, Communication

EDUCATION & ACHIEVEMENTS

- B.Tech – Computer Science Engineering
- Gujarat Technological University | Aug 2022 – Jun 2026
- CGPA: 9.43/10 (No Backlogs)
- GTU Semester 1 Topper – Perfect 10 SPI
- Core Subjects: DSA, OOP, DBMS, OS, Computer Networks
- GSSoC 2026: 9,000+ Contribution Points
- LeetCode: 180+ Problems Solved
